

GET THE BEST OF BOTH WORLDS

DRFortress has combined the benefits of public and private cloud computing and delivers it all via Hawaii's premier datacenter and digital hub

Cloud Services That Deliver Value to our Customers

Flexible Billing Options (Fixed Monthly or Usage Based)

- Freedom of choice with usage-based billing using burst pricing or subscription-based pricing allowing for time and volume-based discounting
- Choice of pay-as-you-use or term-based negotiable contract with guaranteed SLAs

Neutral Platform

- Flexibility to run (nearly) any x86-compatible operating system, unmodified as well as providing a certified Solaris platform
- Powerful private networking allows multiple private VLANs per Virtual Machine to segment network traffic instantaneously
- Supports all TCP/IP traffic types including multicast and broadcast
- Multiple storage and networking interfaces per Virtual Machine with private line or point-to-point access from your choice of carrier or ISP or directly connected to your equipment
- Ability to host clients' own IP ranges and clients can upload/download their own disk images

Ultimate Control

- 24/7 online root level access of your Virtual Machine with complete control of your o/s kernel (apply service packs at will)
- Instantly create Virtual Machines and size capacity to meet your exact IT needs in CPU, RAM, and Disk Space without being forced to choose from pre-configured bundles
- Set up multiple environments in the same account to manage multiple customers or departments
