

DRFortress Cloud Connect

Hawaii's Only Cloud Migration On-Ramp to Public Clouds

In order to remain competitive, businesses rely on optimal performance in the cloud. However, as more cloud applications and online tools are added to your business IT infrastructure, increased costs and resources needed to build and manage private connections to multiple cloud providers become a heavy burden.

Lower Risk, Cost and Latency With the DRFortress Cloud Migration & On-Ramp Solution via Cloud Connect

DRFortress, Hawaii's only carrier-neutral data center and Cloud Marketplace, has the solution. DRFortress offers the first cloud direct connection from Hawaii into the Equinix Cloud Exchange Fabric® to provide Hawaii businesses high-speed, reliable, secure cloud access while lowering latency, cost and risk into the cloud.

DRFortress' **Cloud Migration & On-Ramp Solution via Cloud Connect** enables customers to remotely access any public cloud provider and effortlessly on-ramp to their cloud applications and services. This includes connecting to any public cloud service provider not readily accessible in Hawaii, such as **Amazon Web Services, Google, Microsoft Azure, Office365, Oracle Cloud** and more.

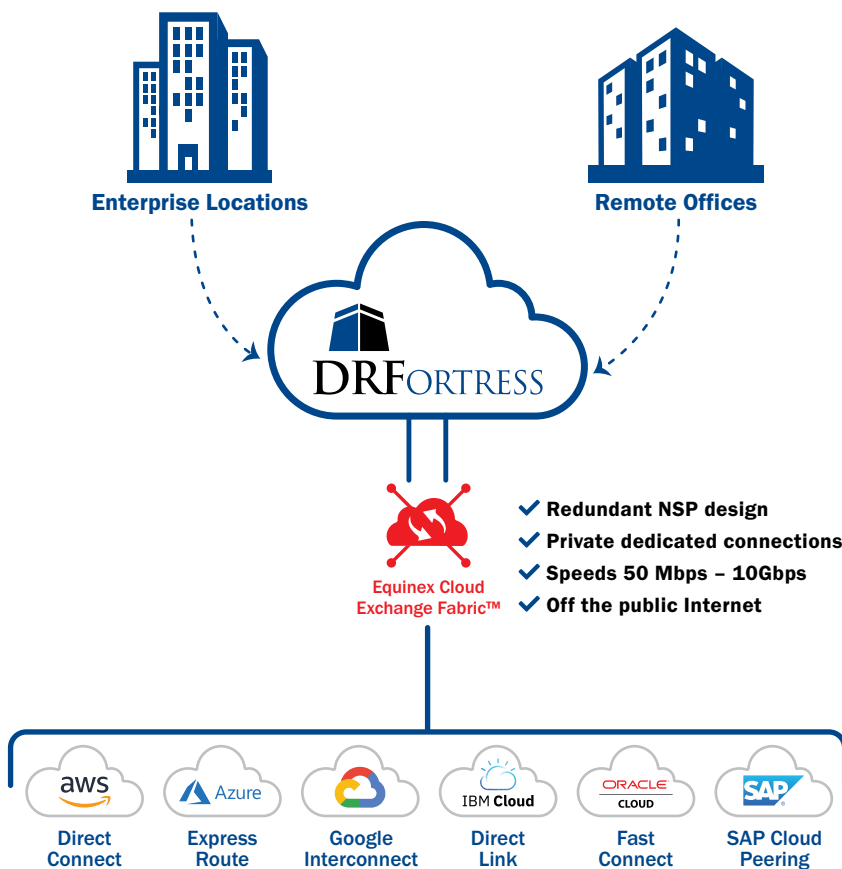

This direct connect access is ideal for customers in Hawaii contemplating a hybrid cloud infrastructure or a first low-risk step to slowly on-ramp into public cloud services without compromising IT infrastructure security, reliability or latency for their critical applications.

Extend Your Global Reach

- DRFortress Cloud Connect extends the edge to businesses in Hawaii with a secure private line to your choice of public clouds through a dedicated port.
- The high-speed, secure and direct connection from the world-class DRFortress data center in Hawaii links to the Equinix LA facility and Equinix Silicon Valley Cloud Fabric location in California.
- Direct cloud connections are available to access any of the 45+ Equinix global metro cloud fabric connections, including New York, London, Hong Kong, Singapore and Tokyo.

This Layer 2 network solution will deliver the most reliable access to these public cloud providers and other cloud networks.

DRFortress Cloud Connect Benefits:

Initial Step Into the Cloud at Low Risk

Low risk to slowly evaluate what other applications would benefit your business via a simple port connection.

Lower Connectivity Costs Up to 50%

Immediately reduce your network costs by utilizing a single direct connect or choose from one of the many extremely low latency and competitively priced local providers in the DRFortress data center.

Highly Secure, High-Speed Access

Connectivity to all major cloud and content providers via a highly secure and high-speed layer 2 connectivity access instead of utilizing the less secure public internet to access your critical cloud-based applications.

Improved Productivity

Fast, secure and reliable connection to cloud-based applications creates efficiencies for your business.

Redundancy & Reliability

World-class network to network direct connectivity utilizing diverse NNI routes, multiple redundant telecommunication carrier circuits, and connections into redundant zones in the Equinix Cloud Exchange Fabric®.

Dependable Support & Customer Service

DRFortress has earned the reputation of being reliable, fast, courteous, and supportive to all our customers. Our on-call operations team is available 24 hours a day, 7 days a week to assist until your cloud services are fully operational.

The DRFortress Cloud Marketplace is your one-stop solution for all of your business cloud infrastructure, computing and storage needs.

Contact DRFortress today to learn how you can **migrate & on-ramp** your migration to any cloud applications and solutions in the world with Cloud Connect.
