backed with 4.2 MW of generator power

**300+**
CUSTOMERS

**55,000**
SQUARE FOOT FACILITY
serving Hawaii & the Pacific

**28** NEUTRAL INTERNET EXCHANGE PARTNERS

DRFORTRESS

www.drfortress.com

# DRFortress is dedicated to providing a world-class data center with high quality customer service for your IT infrastructure needs. Here are some of the ways we meet our commitment to our customers. How many of these quick facts about DRFortress did you already know?

## Always Up

With an average uptime of 99.9997% over the last 15 years, we are confident in our **100% data center uptime service level guarantee**. This means you can rely on highly available, uninterrupted service for all your IT infrastructure operations.

## Hawaii's Digital Hub

As **Hawaii's digital hub**, DRFortress is the largest and only carrier hotel in the State. With access to nearly all Hawaii-serving communication providers, you enjoy the benefits of neutral data center services along with lower pricing on bandwidth, redundant network options, and the ability to add or change carriers at any time without the need to move equipment.

## Safe Zones

The DRFortress facility resides outside known flood zones and is located well within the Department of Emergency Management's officially designated **"Safe Zone."** As a purpose-built data center, the building has been structurally reinforced for earthquakes and is rated for 140 mph (Category 4) winds. With these safety measures, your equipment at DRFortress is safeguarded against the impact of a tsunami, flood or other natural disasters.

## Cloud Solutions

In addition to our data center solutions, DRFortress offers public, private and hybrid **cloud solutions** from best-of-breed, industry-rated cloud backup, computing, storage and file sharing service providers—all at lightning-fast speeds.

## Hawaii's Only Commercial Internet Exchange

DRFortress is home to the only commercial Internet exchange in Hawaii. **DRF*xchange*** allows customers to bypass intermediary networks and send traffic to each other directly. Local data traffic on the DRFortress Internet Exchange never leaves the building, so we help local traffic stay local.

## Certifications

Our facility is reviewed annually for SSAE 16 Type II Audit and PCI DSS Certification—a value we proudly pass on to you. We also offer **complementary assistance** with your compliance audit should you need it.

## Around-the-Clock Services

We offer **around-the-clock** manned security, access, and assistance with your equipment in our always-accessible data center. You can also utilize our skilled technicians for both emergency and routine IT needs via our 24/7/365 Remote Assistance services.

## Data Center Experience

Our team has **over a century** of cumulative data center experience and maintains direct management, oversight and maintenance of our facility's infrastructure systems. This means we have complete control over our data center and do not rely on third parties to maintain the facility.
