

PRESS RELEASE

## **DRFortress Launches Interactive Hawaii Data Center Virtual Tour**

*DRFortress Honolulu Data Center Campus Comes to Life Online with 360° Interactive Virtual Tour*

**HONOLULU, Hawaii — January 16, 2022 –** [DRFortress](#), the largest and only carrier-neutral data center and cloud marketplace operating in Hawaii, has launched a 360 degree, high definition, immersive [virtual tour](#) of the state-of-the-art DRFortress data center campus in Honolulu, Hawaii.

The virtual tour showcases interactive panoramic photos with detailed floor plans and tour views throughout the two-story, 55,000-square-foot DRFortress data center, the largest data center, business network and cloud marketplace in Hawaii. The DRFortress virtual tour includes built-in hotspots, creating an enhanced experience for visitors to learn more about a specific room or space inside Hawaii’s preeminent data center.

“We are thrilled to provide a unique way to explore the DRFortress data center around the globe from anywhere, on your own device,” said Fred Rodi, President and Co-founder of DRFortress. “As a technology leader and the best-equipped data center in Hawaii, DRFortress brings the Hawaiian business community and global partners together swiftly and safely to deliver global reach with fast, secure, and affordable public cloud and data center services.”

[Since 2006](#), the DRFortress data center in Honolulu has completed three expansions and grown more than ten times in revenue, space, environmental controls, and power capacity than any other local supplier. The company offers the [largest choice of networks in Hawaii](#), allowing customers to easily and directly connect with every major network, internet service provider and content provider around the world. DRFortress is building another facility planned for Q4 2022 to meet the accelerated demand for IT services across Hawaii.

###

**About DRFortress**

DRFortress is the largest and the only carrier-neutral data center and cloud marketplace operating in Hawaii. For 15 years, our company has been meeting the data center needs of Hawaii's enterprises, content companies, system integrators, carriers, wireless service providers, cable companies and ISPs. DRFortress provides customers with customized high-end, resilient, reliable, environmental-friendly, next-generation solutions to meet their data-intensive business requirements, enabling them to focus on their core business. As Hawaii's Digital Hub and largest business network, DRFortress houses the densest concentration of IP carriers and networks in Hawaii and is the only commercial Internet Exchange in the state to provide flexibility, cost-efficiency and scalability for customers. Our world-class data center facility is located well outside the island's extended flood and tsunami zones, ensuring your mission-critical data and systems are well-protected and your business' IT operations are uninterrupted during an emergency or natural disaster.
