MSSP FAQ

Q: Why Rapid 7?

A: Rapid 7 has award-winning technology and a team of experts with a mission to help companies advance securely. R7 is the only technology that gives a full and actionable view of your environment, with a clear view of assets, exploits, and what needs to be done to reduce risk in the environment in real-time.

Q: What is the Stellar MSSP On-Premise R7 Appliance?

A: The Appliance is a plug-and-play solution for the R7 security collector and scan engine, designed for fast performance and simple setup and management.

Q: What is InsightConnect?

A: InsightConnect streamlines and accelerates highly manual and time-intensive processes, providing time savings with over 300 plugins and customizable workflows.

Q: What is InsightIDR?

A: InsightIDR is a native SaaS SIEM and XDR solution that accelerates detection and response across endpoints, network, users, cloud, and more with reliable alerts, investigations, and automation.

Q: What is SIEM?

A: SIEM is a tool that centralizes, correlates, and analyzes data to detect security issues, meeting compliance needs and identifying and containing attackers faster.

Q: What is XDR?

A: XDR is a cross-layered threat detection and response tool that gathers and correlates data for better visibility and insights into potential threats.
