DRFortress Cloud Connect

Hawaii's Only Cloud Migration On-Ramp to Public Clouds

In order to remain competitive, businesses rely on optimal performance in the cloud. However, as more cloud applications and online tools are added to your business IT infrastructure, increased costs and resources needed to build and manage private connections to multiple cloud providers become a heavy burden.

Lower Risk, Cost and Latency With the DRFortress Cloud Migration & On-Ramp Solution via Cloud Connect

DRFortress, Hawaii's only carrier-neutral data center and cloud marketplace, has the solution. In collaboration with Megaport, DRFortress customers will now have dedicated private access to over 280 cloud on-ramps and over 850 on-net locations within Megaport's extensive global network. Moreover, the Cloud Connect will deliver fast, secure connectivity between Hawaii and Cloud Infrastructure, Google Cloud, and an array of cloud, network, and content service providers, ensuring an unparalleled user experience.

Hawaii businesses reduce their network connectivity costs by harnessing a single Layer 2 network circuit for high-speed connectivity ranging from 1G to 100G and straightforward cross-connections to public cloud providers. A fast and reliable connection supports business productivity, scalability and overall profitability.

This direct connect access is ideal for customers in Hawaii contemplating a hybrid cloud infrastructure or a first low-risk step to slowly on-ramp into public cloud services without compromising IT infrastructure security, reliability or latency for their critical applications.

Extend Your Global Reach

DRFortress Cloud Connect extends the edge to businesses in Hawaii with a secure private line to your choice of public clouds through a dedicated port. Enabling the following benefits:

Low Risk Initial Step into the Public Cloud - Slowly evaluate what applications would benefit your business via simple port connection without a significant risk or commitment to large capital resources.

Reduced Operational/On-going Costs - Immediately reduce your network costs by utilizing a single direct connect or choose from one of the many extremely low latency and competitively priced local providers.

Security - Connectivity to all major cloud and content providers via a highly secure and high-speed layer 2 connectivity access instead of utilizing the less secure public internet to access your critical cloud-based applications.

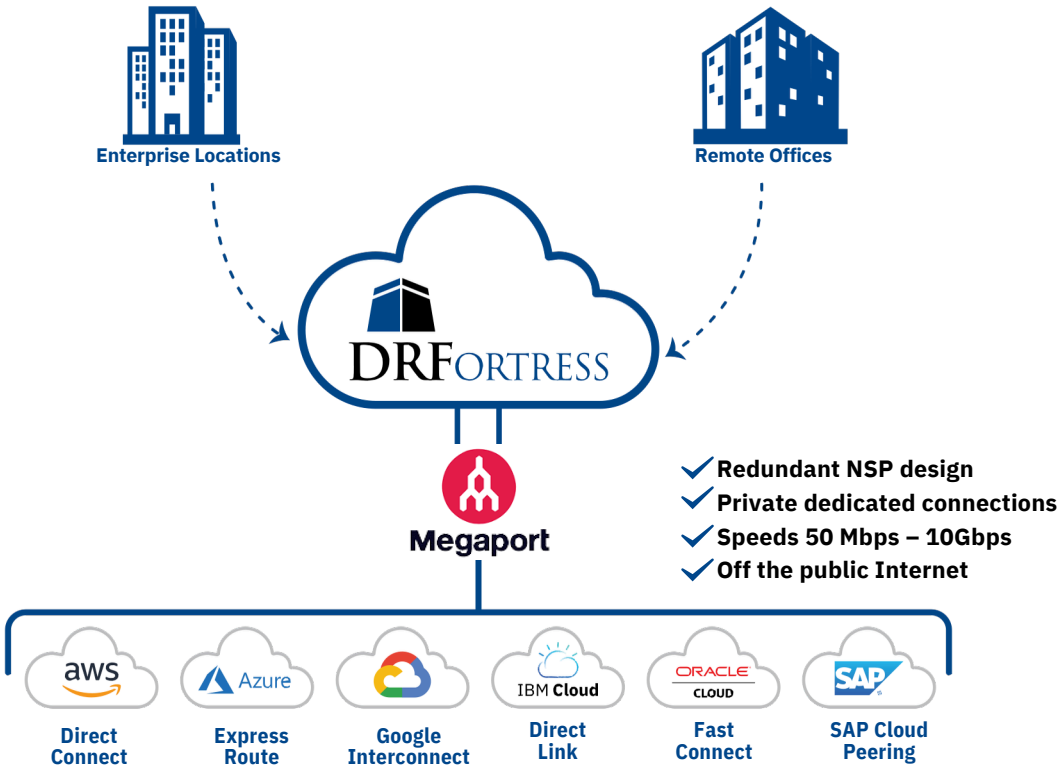
Operational Reliability - Low-latency, reliable connection to cloud-based applications creates efficiencies for your business. Along with a design-based SLA and 24x7x365 support.

DRFortress Cloud Connect Benefits:

Improved Productivity
Fast, secure and reliable connection to cloud-based applications creates efficiencies for your business.

Redundancy & Reliability
World-class network to network direct connectivity utilizing diverse NNI routes, multiple redundant telecommunication carrier circuits, and connections into redundant zones within Megaport's extensive global network.

Dependable Support & Customer Service
DRFortress has earned the reputation of being reliable, fast, courteous, and supportive to all our customers. Our on-call operations team is available 24 hours a day, 7 days a week to assist until your cloud services are fully operational.



This Layer 2 network solution will deliver the most reliable access to these public cloud providers and other cloud networks.

The DRFortress Cloud Marketplace is your one-stop solution for all of your business cloud infrastructure, computing and storage needs.

Contact DRFortress today to learn how you can **migrate & on-ramp** your migration to any cloud applications and solutions in the world with Cloud Connect.
